Cancer metastasis

mini-symposium

December 15/16th 2026

Centre de Recherche en Biomédecine, Strasbourg

EVs & immune regulation of metastasis

December 15th 9-12h

Julie Helft (Institut Cochin, Paris): *Macrophages subset in tumor immunity*

Rubina Baglio (UMC, Amsterdam): *Inflammatory signaling by extracellular vesicles in cancer and autoimmunity*

Julie Gavard (CRCI2NA, Nantes): *EV Phone Home: Navigating the lysosomal galaxy*

Benoît Marteyn (IBMC, Strasbourg): *O2-dependent modulation of neutrophil viability and antimicrobial functions*

Jean Albrengues (IRCAN, Nice): *Neutrophils Extracellular Traps promote cancer initiation*

Hector Peinado (CNB-CSIC, Madrid): *Defining the extracellular vesicle-DNA damage axis along tumor progression*

Metastatic dissemination : from cellular plasticity to mechanoadaptation

December 16th 9-12h

Françoise Dantzer PhD (BSC, Illkirch): *PARP3 in cancer aggressiveness: a DNA repair protein emerging in mechanosensitive response*

Claire Valotteau (DYNAMO, Marseille): *Biophysical properties of circulating tumor cell clusters*

Servane Tauszig-Delamasure (NeuroMyoGène, Melis, Lyon): *Tracking medulloblastoma back to its embryonic roots: a new avian model reveals functional proximity of tumoral cells to their lineage of origin*

Odile Filhol-Cochet (CEA, Grenoble): *META-Predict: toward a microfluidic device to predict metastatic outgrowth*

Eloïse Grasset (CRCI2NA, Nantes): *Epithelial-mesenchymal plasticity in triple-negative breast cancer metastasis*

CRBS, 1 Rue Eugène Boeckel, 67000 Strasbourg

Free entrance - For more informations: hyenne@unistra.fr
