Program

Morning

- 9:00** Welcome
- 9:25** Words of welcome
- 9:30** Lennart MARTENS - Ghent University
The proteome-wide modification landscape and its applications in molecular ageing
- 10:05** Julie KARPENKO
Université de Strasbourg - CNRS
Environmentally sensitive fluorescent probes for bacteria
- 10:40** Vianney POIGNAVENT - Serendip Innovation
A modular plant virus-derived nanoparticle for drug vectorization
- 11:15** Thibaut BRUGAT - Domain Therapeutics
Understanding the role of GPCRs in the tumor microenvironment : identification & validation of novel immuno-oncology targets
- 12:00** Lunch

Afternoon

- 13:30** Frédéric BIHEL & Frédéric SIMONIN
Université de Strasbourg - CNRS
Characterization of a novel, orally bioavailable NPFF receptor antagonist for the treatment of opioid-induced hyperalgesia and analgesic tolerance
- 14:05** Vincent GASS - Recobia Therapeutics
Facilitating the deployment of cutting-edge oncology treatments by modifying their administration route
- 14:40** Lara EL KAAKOUR & Dylan MASTRIPOPOLITO
DDD laureates 2022 - Novel therapeutic approach in NASH based on combination of a pharmacological peptide and cell-based therapy
- 15:10** Coffee Break
- 15:35** Challenge DDD
- 17:15** Deliberation
- 18:00** Awards
