Plenary Session:

How to increase the number of MedTech unicorns in Europe?

Europe is currently benefiting from dynamic MedTech start-up ecosystems. However, not so many of them succeed in scaling-up. How to better organise stock market and create a dynamic European environment driving growth, innovation and where entrepreneurs can find the support and tools they need to thrive? What are the possible strategies and paths to scale-up on the MedTech market in Europe?

Track 1: Collaborate to innovate

#Licensing #Partnerships #R&D

- > Big size vs mid-size companies: Different ways to deal with early-stage start-up assets?
- > What are the key factors of success in the relationship between an academic institution and a resulting spin-off?

Track 2: Financing innovation

#VCs #Startups #Investors

- > How are healthcare systems and health plans directly investing in innovative companies in Europe?
- > Agnostic investors or pure players in the MedTech sector: Who is becoming prominent in the early-stage financing scene?

Track 3: Market innovation

#Regulation #BusinessModels #Strategy

- > How does IT tools contribute to accelerate the process of completing clinical trials in the MedTech sector?
- > MedTech SMEs and start-ups: What are the strategies & initiatives to collectively answer to public tenders?

Track 4: Digital innovation

#AI #Data #Transformation

- > Connected devices redesign health care: How are MedTech companies adapting to this new environment?
- > MedTech and digital industry: Which grounds for collaboration?
