

Cancer Grand Challenges: A global research initiative

Informational workshop to facilitate the participation of France-based researchers

As you may already know, **Cancer Grand Challenges***, the worldwide research funding programme that empowers the global research community to solve cancer's toughest problems, will be announcing its new challenges early March this year.

To engage the France-based research community and to promote their successful applications, the **French National Cancer Institute (INCa)**, a partner of the initiative, is organising a dedicated **workshop** at

Institut Pasteur, Paris 15^e
7th of April from 14:00 to 17:00

[Registration link](#)

David Scott, director of Cancer grand Challenges, **Gemma Balmer**, head of Research at Cancer Grand Challenges and **Fabrice André**, member of the Cancer Grand Challenges Scientific board, will be present to share with you everything you need to know about the programme. **Bruno Quesnel**, Director of Research and innovation at INCa will be there to emphasize the opportunity Cancer Grand Challenges is to the French research community. **Olivier Delattre** and **Emmanuel Donnadieu**, co-investigators of two previously funded teams, will come to share their experience and the lessons learned.

This meeting will also give the opportunity to discuss and identify the obstacles that may hinder successful applications.

***What is Cancer Grand Challenges ?** A global research funding initiative

- co-founded by **Cancer Research UK** and the **US National Cancer Institute**
 - Up to **25 million euros** for 5 years for each successful team
 - Any researcher from around the world can apply
 - Open to any research discipline
